

RS PRO Glass 360

Big on Customization, Unique in applications

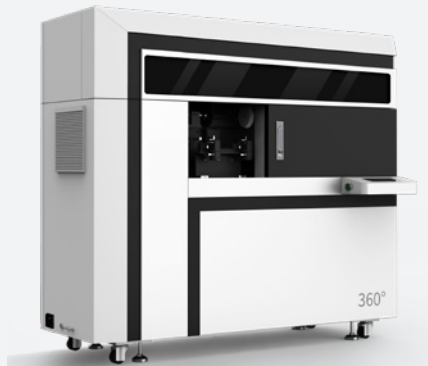

RS Pro, transfer your image!

Fast. Creative. Commercially smart.

Bring your bottles to life with the RS Pro Glass 360 – the powerhouse for professional printing on cylindrical objects such as bottles, tumblers, tubes, and more. With its smart design and high-performance output,

Unlike conventional UV bottle printers, the RS Pro Glass 360 stands out with its ultra-fast production speed, striking 5D textured print effects, and ability to print seamlessly on cylindrical, tapered, and conical surfaces. Its full 360° wrap capability ensures flawless, edge-to-edge decoration on every item.

- ✓ **Fits almost all cylindrical shapes** – like glass, stainless steel, ceramics, metal, and (transparent) plastics with the internal bottle scanner
- ✓ **Brilliant colors to ensure luxurious appearance** – by combining white and CMYK with varnish
- ✓ **Ultra fast production** – complete cycle in just 30 seconds
- ✓ **Vivid, lasting colors** – UV printing technology for durable, scratch-resistant results
- ✓ **Advanced texture printing** – high droplet capability up to 13mm for embossed, tactile finishes on curved bottles or glasses

Whether you run an online shop, create corporate gifts, or want your brand to shine on bottles – the RS Pro Glass 360 delivers personal and professional results.
